Education Conference: At The Heart Of Learning

Raising aspiration and achievement for vulnerable students

Monday 1st July 2019

St Mellion International Resort, Saltash, Cornwall

This year, our conference is focusing on how to support students who are at risk of under-achievement, school disengagement and school exclusion. As a multidisciplinary team, we are highly experienced in supporting barriers associated with Adverse Childhood Experiences (A.C.E's), including complex developmental trauma.

Our conference will centre around how those supporting vulnerable young children can develop a deeper understanding of the risk and resiliency factors a young person may face. We will also focus on evidence-based approaches at a whole school systemic level, for Senior Leaders, and at a direct level for front-line staff working with children, young people and families.

Key Note Speakers Include:

Mark Lindfield, Senior Her Majesty's Inspector, South West Region (Retired).

Elizabeth Carney-Haworth, Head Teacher of Torpoint Nursery and Infant school, & Founder of Operation Encompass.

Information on further talks and workshops from guest speakers and Consultant Clinical Psychologists, Educational Psychologists and members of Psychology Associates' multidisciplinary team will be announced shortly!

Feedback from our 2018 Education Conference:

"Adore it! So interesting and so much fascinating information and useful tips and tools. I am left desperate for more!!"

"That's the best training I've had in 10 years as a teacher"

"Excellent thought-provoking day. Inspired by the knowledge and passion of all of the presenters"
