

What is the
Coronavirus?

The Coronavirus can also be called COVID-19 and can make people feel unwell.

People who have Coronavirus might have a high temperature or a cough.

Most people who get Coronavirus will stay at home and get better, just like when we have a cold.

Some people who have the Coronavirus will go to hospital to get better. They will have doctors to help them to get better.

People catch the Coronavirus when other people with the virus come into contact with them. Either through coughing or sneezing on something or by touch.

I can help to stop the spread of germs by washing my hands well.

I can take my time when I wash my hands, making sure I wash between my fingers and all over my hands. I could sing happy birthday twice to make sure I wash for enough time.

I should make sure that I use soap and warm water when I wash them. Some places may have hand gel to use instead.

There is lots of information on the news about Coronavirus and this might make me feel worried. If I am worried I should talk to my parents or my teachers. They can help to answer my questions.
