

EDUCATIONAL PSYCHOLOGY SERVICES AT PSYCHOLOGY ASSOCIATES

Is your school in need of regular support from an Educational Psychologist?

We currently have capacity within our education team to offer contracts spanning the academic year to our local schools. We may also be available for one-off assessments or other pieces of work.

Examples of the services we can offer to schools:

EP Assessment and one-to-one work

With children and young people

Consultation

With school staff and/or parents to explore concerns and support problem-solving

Staff training

On topics including; Understanding and Supporting ACEs, Trauma and Attachment, Precision Teaching, Person Centred Planning, Emotionally Based School Non-Attendance (EBSNA), Mental Health First Aid, Sensory Integration and staff Reflective Practice

Staff support and supervision

Including support for senior leadership and other staff members supporting vulnerable children.

We work closely with a wider multi-disciplinary team to offer further training topics, as well as services such as mental health assessments, individual counselling and family therapy, wellbeing groups to children in school, therapeutic parenting support, support/assessment regarding sensory integration (from our Occupational Therapists) and speech and language assessments.

We are also an adoption support agency. We can signpost to the Adoption Support Fund (ASF) and support throughout the application process as needed. Some of our clinicians also support the delivery of recommended therapies, e.g. Reducing Anxiety Management Plans (RAMP).
